The AWS Certified Solutions Architect – Professional level is an advanced course aimed at individuals who have two or more years hands-on experience designing and deploying cloud architecture on AWS. At the end of the course you need to be able to understand: how to evaluate cloud application requirements and make architectural recommendations for implementation, deployment, and provisioning applications on AWS; also be able to provide best practices guidance on the architectural design across multiple applications, projects, or the enterprise. The class will cover:

- Design and deploy dynamically scalable, highly available, fault-tolerant, and reliable applications on AWS
- Select appropriate AWS services to design and deploy an application based on given requirements
- Migrate complex, multi-tier applications on AWS
- Design and deploy enterprise-wide scalable operations on AWS
- Implement cost-control strategies
