Certified Authorization Professional (CAP)/ Risk Management Framework (RMF)

This CAP/RMF course is designed for the information security practitioner who champions system security in line with an organization’s mission and risk tolerance while meeting legal and regulatory requirements. Our CAP/RMF training covers formalizing processes used to assess risk and establish security requirements and documentation.

Duration
4 Days

Certification
Certified Authorization
Professional (CAP) / Risk
Management Framework (RMF)

POINT

Training Program

The Certified Authorization Professional (CAP) certification is an objective measure of the knowledge, skills and abilities required for personnel involved in the process of authorizing and maintaining information systems. Specifically, this credential applies to those responsible for formalizing processes used to assess risk and establish security requirements and documentation. Their decisions will ensure that information systems possess security commensurate with the level of exposure to potential risk, as well as damage to assets or individuals.

The CAP credential is appropriate for commercial markets, civilian and local governments, and the U.S. Federal Government, including the State Department and the Department of Defense.

The Risk Management Framework (RMF) is an important process to follow because it is used to identify security threats to an organization and minimize overall risk upon impact.

Candidates for the CAP certification exam need to have a 2 years minimum of experience in one or more of the 7 domains of the CAP Common Body of Knowledge (CBK). If you do not have the experience you can still take the CAP exam, but will instead become an Associate of (ISC)² after successfully passing the exam. You then have 3 years to complete the required 2 years of experience to obtain the CAP certification.

POTENTIAL JOBS:

- Network Application Developer
- Security Operations Technician
- Cybersecurity Compliance Analyst
- Security Analyst

Training is recommended for Managers, system owners and IT/security personnel that are either transitioning to or implementing risk management fundamentals for the first time.

Candidates take a 3 hour exam consisting of 125 multi-choice questions. Candidates must score a minimum of 700 out of 1000 points to pass.

Learning Objectives

- Info Security Risk Management Program
- Categorization of Information Systems (IS)
- Selection of Security Controls
- Implementation of Security Controls
- Assessment of Security Controls
- Authorization of Information Systems (IS)
- Continuous Monitoring
- Understand the Risk Management Framework for DOD IT Authorization process
- Understand FISMA & NIST processes for authorizing Federal IT systems
- Explain key roles & responsibilities
- Explain statutory and regulatory requirements
- Apply these principles to real-world activities and situations

Course Schedule

Certified
Authorization
Professional

SESSION 1:

- CAP overview and test taking tips
- **Domain 1** – Info Security Risk Management Program
- **Domain 2** – Categorization of Information Systems (IS)

SESSION 2:

- **Domain 3** – Selection of Security Controls
- **Domain 4** – Implementation of Security Controls

SESSION 3:

- **Domain 5** – Assessment of Security Controls
- **Domain 6** – Authorization of Information Systems (IS)

SESSION 4:

- **Domain 7** – Continuous Monitoring
- Review questions and exam simulation

COURSE FEATURES

- Live instructor-led training in modern classrooms
- A thorough review of CAP/RMF topics by industry experts
- 24 x 7 access to the real labs in classrooms and remotely
- 100% latest material & unlimited live hands-on labs & 600+ practice questions
- Confidence building hands-on training
- Study material, notes, videos, lab book, and practice questions included in course price
