## Training Program

The CGRC certification is ideal for information technology, information security and cybersecurity professionals responsible for governance, risk and compliance within an organization. This certification is an option for those who already hold another (ISC)² certification – like the CISSP – who want to demonstrate their expertise in this high-profile specialty.

Those who earn and hold the CGRC have the knowledge and skills to integrate governance, performance management, risk management and regulatory compliance within the organization while helping the

organization achieve objectives, address uncertainty and act with integrity. CGRC professionals can align IT goals with organizational objectives as they manage cyber risks and achieve regulatory needs. They utilize frameworks to integrate security and privacy with the organization's overall objectives, allowing stakeholders to make informed decisions regarding data security and privacy risks.

The Risk Management Framework (RMF) is an important process to follow because it is used to identify security threats to an organization and minimize overall risk upon impact.

### POTENTIAL JOBS:

- Cybersecurity Auditor
- Cybersecurity Compliance Officer
- GRC Architect or Manager
- Cybersecurity Risk & Compliance Project Manager or Analyst
- Third –Party or Enterprise Risk Manager
- GRC Analyst or Director
- System Security Manager or Officer
- Information Assurance Manager

To qualify for the CGRC you must have a minimum of two years of cumulative paid work experience in one or more of the seven domains of the CGRC Common Body of Knowledge (CBK).

Candidates take a 3 hour exam consisting of 125 multi-choice questions. Candidates must score a minimum of 700 out of 1000 points to pass.

## Learning Objectives

- Information Security Risk Management Program
- Scope of the Information System
