

CompTIA Advanced Security Practitioner (CASP+)

CompTIA Advanced Security Practitioner (CASP+) is the ideal certification for technical professionals who wish to remain immersed in technology as opposed to strictly managing.

Duration
4 Days

Certification
CompTIA Advanced Security Practitioner (CASP+)

Training Program

CASP+ is the only hands-on, performance-based certification for practitioners — not managers — at the advanced skill level of cybersecurity. While cybersecurity managers help identify what cybersecurity policies and frameworks could be implemented, CASP+ certified professionals figure out how to implement solutions within those policies and frameworks.

The CASP+ certification validates advanced-level competency in risk management, enterprise security operations and architecture, research and collaboration, and integration of enterprise security. The CASP+ exam covers the following:

- **Security Architecture:** Expanded coverage to analyze security requirements in hybrid networks to work toward an enterprise-wide, zero-trust security architecture with advanced, secure cloud and virtualization solutions
- **Security Operations:** Expanded emphasis on newer techniques addressing advanced threat management, vulnerability management, risk mitigation, incident response tactics and digital forensics analysis
- **Security Engineering and Cryptography:** Expanded to focus on advanced cybersecurity configurations for endpoint security controls, enterprise mobility, cloud/hybrid environments and enterprise-wide PKI and cryptographic solutions
- **Governance, Risk and Compliance:** Expanded to support advanced techniques to prove an organization's overall cybersecurity resiliency metric and compliance to regulations, such as CMMC, PCI-DSS, SOX, HIPAA, FISMA, NIST and CCPA

CASP+ is compliant with ISO 17024 standards and approved by the US DoD to meet directive 8140/8570.01-M requirements. Regulators and government rely on ANSI accreditation, because it provides confidence and trust in the outputs of an accredited program. Over 2.3 million CompTIA ISO/ANSI-accredited exams have been delivered since January 1, 2011.

POTENTIAL JOBS:

- Security operations center (SOC) manager
- Security analyst
- IT cybersecurity specialist/INFOSEC specialist
- Cyber risk analyst

PREREQUISITES

CompTIA recommends at least ten years of experience in IT administration, with at least five of those years including hands-on technical security experience.

Learning Objectives

- Security Architecture
- Security Operations
- Security Engineering and Cryptography
- Governance, Risk and Compliance

EXCELLENCE
THROUGH
EDUCATION

Intellectual
POINT

Course Schedule

SESSION 1:

- Security Architecture

SESSION 2:

- Security Operations

SESSION 3:

- Security Engineering and Cryptograph

SESSION 4:

- Governance, Risk and Compliance
- Review Questions and Exam Simulation

Unlike other certifications, CASP+ covers both security architecture and engineering – CASP+ is the only certification on the market that qualifies technical leaders to assess cyber readiness within an enterprise, and design and implement the proper solutions to ensure the organization is ready for the next attack.

COURSE FEATURES

- Live instructor-led training in modern classrooms
- A thorough review of CASP+ topics by industry experts
- 24 x 7 access to the real labs in classrooms and remotely
- 100% latest material & unlimited live hands-on labs & 600+ practice questions
- Confidence building hands-on training
- Study material, notes, videos, lab book, and practice questions included in course price

Suite 250
Sterling, VA 20165

WHEN YOU ENROLL IN A INTELLECTUAL POINT CLASS, YOU WILL GET:

A Study Guide

A Class Completion Certificate

- Concise Notes, Memory Tables, Port Tables
- Simulation Question Packet
- Opportunity to attend several live instructor led post-class review sessions
- Video and Audio files
- Google Classroom for each class
- Resume Help
- Job Placement
