EXCELLENCE THROUGH EDUCATION

Training Program

Today's world is one of constant and instant information exchange. Organizations, be it private businesses or government bodies, rely on sophisticated computer databases and networks to share digital information on a daily basis with their subsidiaries, branches, partners, clients, employees, and other stakeholders. However, years of information security incidences and the onslaught of the recent cyber-attacks prove that digital data can be easily compromised. Organizations therefore, are increasingly in need of a new set of skills and processes to ensure the security of information at a scale that will be required tomorrow.

If your aspiration is to have the highest regarded title within the information security profession – CISO, if you already have earned the role of a CISO, or if you are currently playing the role of a CISO in your organization without the official title, the CISO designation is the recognition of your knowledge and achievements that will award you with professional acknowledgement and propel your career.

Achieving the CCISO Certification will differentiate you from others in the competitive ranks of senior Information Security Professionals. CCISO will provide your employers with the assurance that as a CCISO executive leader, you possess the proven knowledge and experience to plan and oversee Information Security for the entire corporation.

PREREQUISITES

In order to qualify to sit for the CCISO Exam without taking any training, candidates must have five years of experience in each of the 5 CCISO domains verified via the Exam Eligibility Application.
