## Intellectual POINT

## Training Program

CISA's success also comes down to having a strong reputation in the marketplace, with global acceptance, recognition and credibility gained through rigorous testing and test administration. The value of CISA is its instant recognition that you are a professional IS auditor. There's no need for an auditor or someone who doesn't know you to question your credentials, you have a CISA, so your credentials are understood.

Enterprises demand IS audit professionals that possess the knowledge and expertise to help them identify critical issues and customize practices to support trust in and value from information systems. The skills and practices that CISA promotes and evaluates are the building blocks of success in the field. Possessing the CISA demonstrates proficiency and is the basis for measurement in the profession.

### WHO SHOULD ATTEND?

- IT auditors
- Information security consultants
- Information security analysts
- Risk managers and professionals
- Anyone interested in learning auditing skills and getting certified

### PREREQUISITES

A minimum of five years of professional information systems auditing, control or security work experience is required for certification; however, up to three years can be waived if other requirements are met. You have five years after passing the exam to gain the necessary work experience and apply for certification.
