Certified in Risk and Information Systems Control (CRISC)

The Certified in Risk and Information Systems Control (CRISC) recognized IT professionals who are responsible for an organizations risk management program. CRISC is the only certification that prepares and enables IT professionals for the unique challenges of IT and enterprise risk management and positions them to become strategic partners to the enterprise.

Duration
3 Days

Certification
Certified in Risk and Information Systems Control (CRISC)

Training Program

CRISC certified professionals manage risk, design and oversee response measures, monitor systems for risk, and ensure the organizations risk management stategies are met. Organizations look for employees with the CRISC credential for jobs such as IT security analyst, security engineer architect, information assurance program manager, and senior IT auditor.

What You Will Learn:

- Identify risks related to an organization's internal and external business and IT environments
- Identify potential threats and vulnerabilities to the organization's people, processes and technology
- Develop and analyze IT risk scenarios to determine potential impact
- Identify the effectiveness of existing controls
- Identify key stakeholders and assign risk ownership
- Communicate results of risk assessments
- Consult with risk owners on the design and implementation of mitigating controls
- Define and establish data-driven key risk indicators
- Monitor changes in risk indicators
- Report risk indicator changes to key stakeholders
- Analyze risk indicators to determine the effectiveness of existing controls

PREREQUISITES

There are no prerequisites to take the exam. However, in order to apply for certification you must meet the necessary experience requirements as determined by ISACA: a minimum of three years of cumulative work experience performing the tasks of a CRISC professional across two of the four CRISC domains. Of these two required domains, one must be in either domain 1 or 2 (risk identification or assessment).

WHO SHOULD ATTEND?

- IT and risk professionals
- Business analysts
- Project managers
- Compliance professionals
- Anyone tasked with identifying, evaluating and mitigating organizational risk

Learning Objectives

- Domain 1: IT risk identification
- Domain 2: IT risk assessment
