

Real Training. Real Practice. Real Results.

## Certified Scrum Master<sup>®</sup> (CSM<sup>®</sup>)

### Training Program

#### Course

The Certified Scrum Master<sup>®</sup> (CSM<sup>®</sup>) certification program is one of the most popular agile methodologies to date, with tools and techniques applicable to more than just software development projects. This course will assist prospective Scrum masters, product owners, and team members with understanding of core Scrum practices. This includes an outline of the roles and responsibilities of members of the Scrum team, the importance of good communication, and the role of stakeholders.

By earning a Certified Scrum Master<sup>®</sup> certification you will: expand your career opportunities by staying relevant and marketable across all industry sectors adopting agile practices; demonstrate to employers and peers your attainment of core Scrum knowledge; engage with a community of recognized Scrum experts who are committed to continuous improvement.

### Learning Objectives

- Adopting an agile approach to project management
- Overview of the Scrum development process
- Agile project management essentials
- Agile Planning: Project initiating and requirements gathering
- Agile Planning: Doing estimates and completing the release plan
- Managing stakeholder engagement on an agile project
- Ensuring delivery of value and quality in agile project

## Course Features

- Live instructor-led training in modern classrooms
