POINT

The Certified Blockchain Professional is fully vendor-agnostic and practical, focusing on the current state of blockchain technology as well as its future potential. The Certified Blockchain Professional course digs deep into the main characteristics and features of the distributed ledger technology (DLT) as well as introduces Blockchain's new 3S (Secure-Scalable-Sustainable) proprietary framework. Students will also get a deep understanding of blockchain technology and mining of cryptocurrency.

The Certified Blockchain Professional course begins with the technical foundations of blockchain, such as distributed and decentralized systems, cryptography, and mining. Students will then learn how to develop applications using Ethereum, a decentralized virtual machine. Additionally, students will explore different blockchain enterprise applications such as Hyperledger, introduced by the Linux Foundation and widely used by IBM. Most importantly, the course will cover multiple blockchain implementation concepts by immersing students into sustainable and scalable blockchain development, the cornerstone of a decentralization strategy.

To attend the 5 days course and be able to integrate Blockchain functionalities into business operations, commercial applications, or open source peer-to-peer transactions you need some technical experience, skills and/or qualifications as follows:

- Exposure in Programming Languages (Required)
- Basic Understanding of Cryptocurrencies (Preferred)
- Experience with Bitcoin and Ether (Preferred)
