Intellectual POINT

Training Program

The CompTIA A+ course is not only an excellent starting point for anyone entering the IT field but it will also serve as a great refresher for those already working in the IT industry. This course will provide a comprehensive crash course in what it takes to support the technology we use today. From PC to Mac to iPhones and Android, the CompTIA A+ course is perfect for those looking to have a well rounded skill set for starting in the IT field. Get the certification that is going to propel you into your new career!

CompTIA A+ is the only industry recognized credential with performance testing to prove professionals can think on their feet to perform critical IT support tasks. It is trusted by employers around the world to identify the go-to person in end point management & technical support roles. CompTIA A+ appears in more tech support job listings than any other IT credential.

The exams include nine domain areas:

- Mobile Devices
- Networking
- Hardware
- Virtualization and Cloud Computing
- Hardware & Network Troubleshooting
- Operating Systems
- Security
- Software Troubleshooting
- Operational Procedures

EXAM

- CompTIA A+ 220-1101 covers mobile devices, networking technology, hardware, virtualization and cloud computing and network troubleshooting.

- CompTIA A+ 220-1102 covers installing and configuring operating systems, expanded security, software troubleshooting and operational procedures.

DOD INFORMATION ASSURANCE WORKERS

The A+ certification the meets 8570.1 mandate, and Infosec's authorized CompTIA A+ Boot Camp is a tremendous community resource for 8750.1 compliance.
Learning Objectives

- Increased reliance on SaaS applications for remote work
- More on troubleshooting and how to remotely diagnose and correct common software, hardware, or connectivity problems
- Changing core technologies from cloud virtualization and IoT device security to data management and scripting
- Multiple operating systems now encountered by technicians on a regular basis, including the major systems, their use cases, and how to keep them running properly
- Reflects the changing nature of the job role, where many tasks are sent to specialized providers as certified personnel need to assess whether it's best to fix something on site, or to save time and money by sending proprietary technologies directly to vendors.
