ABOUT

This group is for all IT professionals, past, present, and future. We are a dedicated group of professionals who love to learn about anything in the broad IT field, and our group is for all skill levels. We host at least one meetup a month where we get together to learn about new technologies, fields, and opportunities. Our guest speakers are full-time professionals who work with cutting-edge technologies and want to share their passions.

INFORMATION

Our past Meet Up events have been centered on the current trends in the IT Market that is attractive to IT professionals. Some of our events were focused on Cybersecurity, Cloud, Amazon Web Services, The Dark Web, Ethical Hacking, Emerging Technology Solutions, and hands-on activities. We have had IT professionals from the DMV attend along with recruiting companies to foster networking within the field.

"Great session with great information. I really appreciate the view if ethical hacking from a business perspective since it truly is the business (the customer) that makes ethical hacking and IT in general a business itself."
-Will W.

IMPACT

Share knowledge with professionals in the IT industry. Getting people back in the workforce, educating them at no cost, enlightening people with emerging technology. Encouraging women to enter jobs with STEM. Education the youth with technology careers. Supporting veterans to reenter the workforce.

Great class, using Splunk in the company but first time hand-on and learnt a lot in 2 hours.
-Bilal M.
