Training Program

CCNA® stands for Cisco® Certified Network Associate. This "Associate" training program is the first rung on the ladder of Cisco® certification, which leads to "Professional" and finally "Expert" level. The new CCNA® program prepares you for today's associate-level job roles in IT technologies. CCNA® now includes security and automation and programmability. The program has one certification that covers a broad range of fundamentals for IT careers, with one exam and one training course to help you prepare.

Newly retooled for the latest technologies and job roles, the CCNA® training course and exam give you the foundation you need to take your career in any direction.

Cisco Certified Network Associate v2.0 (CCNA 200-301) tests a candidate's knowledge and skills related to network fundamentals, network access, IP connectivity, IP services, security fundamentals, and automation and programmability.

PREREQUISITES

There are no formal prerequisites for CCNA certification, but you should have an understanding of the exam topics before taking the exam.
