

Training Program

Cisco® Certified DevNet Associate

The DevNet Associate certification validates the skills of software developers, DevOps engineers, automation specialists, and other software professionals. The program validates key emerging technical skills for a new kind of IT professional, empowering organizations to embrace the potential of applications, automation, and infrastructure for the network, Internet of Things (IoT), DevOps, and Webex.

Duration
5 Days

Certification
DevNet Associate DEVASC 200-901

EXCELLENCE
THROUGH
EDUCATION

Intellectual
POINT

With the paradigm shift of intent-based networking, software and the network grows more and more interconnected every day. Applications deliver innovative new experiences, and IT professionals can take advantage of automation and DevOps to scale and secure their networking infrastructure. The opportunities to maximize this potential are boundless. But there aren't enough qualified candidates to go around, and hiring managers need to know that you know your stuff. So how can you prove your skills? One word: certification. In fact, 71% of hiring managers say that certifications increase their confidence in an applicant's abilities.

The certification tests your knowledge of software development and design, including:

- Software Development and Design
- Understanding and using APIs
- Cisco Platforms and Development
- Application Development and Security
- Infrastructure and Automation
- Network Fundamentals

PREREQUISITES

DevNet Associate candidates should have one or more years of experience with software development including Python programming.

WHO SHOULD ATTEND?

- Network automation engineer
- Software developer
- System integration programmer
- Infrastructure architect
- Network designer

Learning Objectives

- Software Development and Design - 15%
- Software Development and Design - 20%
- Cisco Platforms and Development - 15%
- Application Deployment and Security - 15%
- Infrastructure and Automation - 20%
- Network Fundamentals - 15%
