

# Training Program

## Certified Ethical Hacker™ (CEH™)

A Certified Ethical Hacker™ is a skilled professional who understands and knows how to look for weaknesses and vulnerabilities in target systems and uses the same knowledge and tools as a malicious hacker but in a lawful and legitimate manner to assess the security posture of a target system(s).

The CEH™ credential certifies individuals in the specific network security discipline of Ethical Hacking from a vendor-neutral perspective. This program will train you on the most advanced tools and techniques used by black and grey hat hackers alike to break into an organization to assess, document, and remediate vulnerabilities from a vendor neutral perspective. CEH will put you in the driver's seat of an interactive, hand's-on learning environment that challenges you to test the integrity of systems and networks by hacking them!

CEH candidates will be immersed into an interactive network hacking environment where they will be shown how to scan, test, hack and secure the systems. Candidates will learn how perimeter defenses work and how to scan and attack their own networks. CEH candidates learn how intruders escalate privileges and what steps can be taken to secure a system. Candidates will also learn about Intrusion Detection, Policy Creation, Social Engineering, DDoS Attacks, Buffer Overflows and Virus Creation. Understand the art of penetration testing in order to create a network intrusion vulnerability prevention strategy.
