# STEM Cyberwarriors Camp 2022

The logo for Intellectual Point, featuring a stylized 'i' and 'p' inside a circle, with the text "Intellectual POINT" and "EXCELLENCE THROUGH EDUCATION" below it.

## Cyber Threat Hunting with Data Science Camp

In this Cyber Threat Hunting with Data Science camp, high school students and middle school students will learn how to use Data Science to detect cyber threats with Splunk Software. Data Science is quickly becoming a must-have for threat hunting. Threat hunters need to be able to find threats and reduce false positives. Seamlessly apply machine learning and data science to hunt and identify threats. This camp will have hands-on exercises and investigations by using data science. You will learn coding, cyber security, strategic planning, logic & reason, data science, and more.

### Schedule

- Day 1** Fundamentals of Cyber Threat Hunting
- Day 2** Fundamentals of Data Science
- Day 3** Start Threat Hunting with Splunk Software
- Day 4** Learn about Machine Learning and how to use it
- Day 5** Hands-on test to find Cyber Threats using Data Science and Machine Learning
