Responsible AI for Decision Makers and Agency Contracting Officers

This course is focused on the ethical, trustworthy, and responsible implementation of AI within the government agencies. It covers AI fundamentals, practical DoD use cases, generative AI technologies and large language models and delves into ethical considerations, risk management, bias and legal issues related to AI. This course aims to equip DoD personnel with the knowledge of the new AI technologies, tools, applications, and the associated risks to help make informed, ethical decisions in the acquisition, procurement and deployment of AI technologies and solutions in the military operations.
