Introduction to the Cyber Security Management Pathway

Overview

The Cybersecurity Management Pathway Program is designed for IT professionals who seek to advance into leadership and governance roles within the cybersecurity field. This program emphasizes strategic decision-making, risk management, and the development of organizational security policies. Participants will refine their ability to oversee cybersecurity initiatives, implement effective security controls, and guide compliance with industry standards and regulations.

Upon completion of this pathway, students will be able to:

Understand Security Principles

Environment Assessment

Security Operations and Development

Security Control/Management of Risk/Compliance through planning and policy implementation

Knowledge of Business Principles related to risk

Compliance and recovery operations

Asset Management, Threat Management and Response
