# Neuroscale AI

Meet Arbi, a lightning-fast AI Assessments solution for smarter decisions

Accelerate resume screening, customer service evaluation, proposal review, compliance checks, interview assessment, & more with AI assessment!
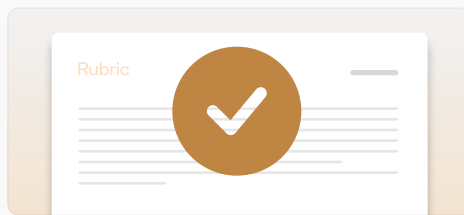

🌐 neuroscale.ai   ✉ sales@neuroscale.ai

Save hundreds of hours with automated resume screening

Screen 100s of resumes in just a few minutes easily by just uploading or importing from your ATS system.

Rank applications instantly with customizable rubrics

Use your own evaluation criteria, let arbi autogenerate one, or even customize the autogenerated one.
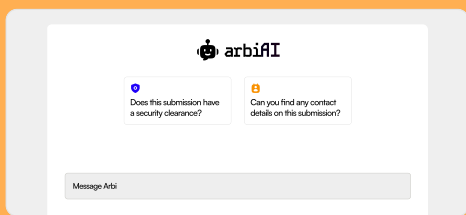

Fully transparent reasoning & explainable AI scoring

Arbi gives detailed chain of thought explanations of how scoring was done for each document including citations.
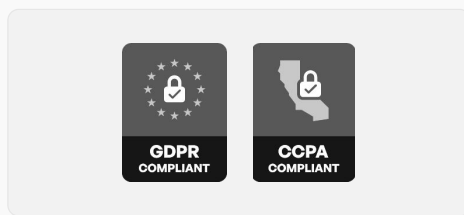

Semantic understanding & mathematical capabilities

Built on Large Reasoning Models, Arbi is able to think and reason, allowing for unbiased and fair evaluations.

Interactive chat for quick clarifications & summarization

Arbi's assessment chat lets you interact with your submissions to get live feedback or questions answered.
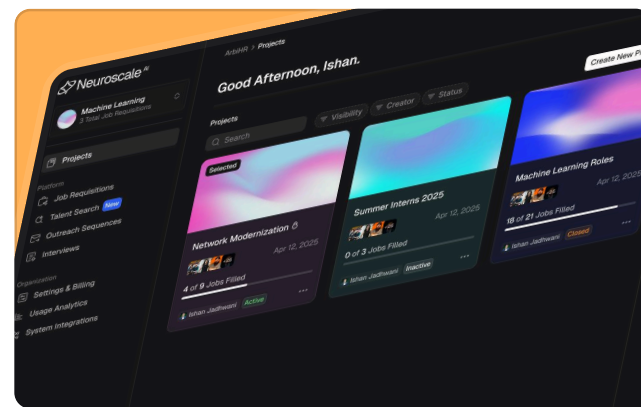

Fully compliant with industry regulations & on-prem support

Arbi strictly complies with GDPR & CCPA, while working fully on-premise in your own environment.

○ What we do

Arbi helps you evaluate & hire the right talent in minutes, not days or weeks.

✧ Powered by Private Generative AI

Powerful locally developed language models ensure fine-tuned accuracy and data security.

◎ Data Integration & Connectors

Arbi is able to integrate with most existing ATS systems & data lakes to speed up data ingest.

◎ Secure Architecture

Arbi is built day-one with end-to-end encryption for document uploads and evaluation results.

⬚ Built on an Agentic Framework

Arbi utilizes agentic functions and workflows to increase the accuracy and reliability of results.

Start evaluating in just 3 simple steps:

Step #1

New Project

Create a project and select your agent use-case.

Step #2

Generate Rubric
A custom rubric from your requirements

Generate a rubric using your requirements with arbi's AI.

Step #3

Candidate Resumes
23%

Upload or import your content and start evaluating.

✓ Assessment Results

Get a prioritized and ranked list of candidates. Click on any scored candidate entry to get full reasoning and details behind how scoring was done for that specific candidate.

⊙ Security

Enterprise-Ready Security, Compliance & Controls

Arbi provides robust, enterprise-ready controls for secure, scalable management and compliance across your organization.

On-Premise Deployment | Audit Logs & Session Control

Cluster Monitoring | API Access | SSO & SCIM Provisioning

Team Management | View all on neuroscale.ai

On-Premise Deployment

Arbi's privacy-first design enables secure, air-gapped deployment on your hardware, giving you full control over data and inference.
